PRODUCT GUIDANCE SHEET

BRAKES PINE DISINFECTANT

A concentrated blend of fast acting cationic biocidal agents blended with a fresh pine fragrance designed to disinfect and deodorise in a wide range of housekeeping and general building services applications.

Product Name: BRAKES PINE DISINFECTANT
Description: Concentrated pine disinfectant
Pack Size(s): 2x5Lt
Pallet Size(s): 80
Product Code(s): A5046

HOW TO USE

Suitable for a wide variety of cleaning operations in housekeeping and building services applications as a damp wipe surface disinfectant. Used to disinfect drains, sinks, floors, bins and other areas where a fresh residual fragrance is desired. Can also be used to disinfect and to freshen linen in the laundry process.

Brakes Pine Disinfectant must be diluted before use using a 30ml 5lt pelican pump, a manual wall mounted bottle/bucket pump or via an automatic chemical/water mixing station.

It must be diluted correctly to water to prepare disinfectant solutions. For bottle solutions add one plunge of a 5lt pelican pump per 750ml labelled trigger spray.

Depending on the degree of soiling and the volume capacity of the bucket being used for disinfecting, we recommend 1 plunge of a 5lt pump per litre. Apply with mop or cloth and allow to air dry.

SAFETY ADVICE

Not classified as hazardous, however we advise that normal cleaning safety practises are adopted. Wear rubber gloves when handling and avoid contact with eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention if irritation persists.

For further detailed information on this product please refer to the Safety Data Sheet.

FOR PROFESSIONAL USE ONLY

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice. **E-Mail Technical:** technical.solutions@rpadam.co.uk
