NOURISH MOULDED FIBRE

Takeaway boxes & tableware –
certified for industrial & home
composting.

Made from
recyclable materials.

Made from reclaimed natural fibre with
no added PFAS. Elegant design in crisp
white colour. Award-winning quality,
made from plants.

'Moulded fibre' vs 'bagasse'

You'll find these certified compostable products
under the category called 'moulded fibre', so
it's easy to tell them apart from the existing
products named 'bagasse'.

Certified for industrial & home composting

Vegware's innovative new moulded fibre range
(certified for industrial & home composting)
demonstrates our commitment to being ahead of
developments in our sector.

Recent updates to compostability certification
requirements mean that our existing white
bagasse ranges were certified for industrial
composting, but this has now lapsed due to
the changes. We believe that most bagasse or
moulded fibre products on the market will be
the same.

For our clients who are composting, we
recommend you transition to our moulded fibre
range. Just ask if you need any further details
about the products or composting options.
