

## Our Pledge To The Planet

**We believe that sustainability doesn't stop at one milestone; our pledge to the planet is that we will constantly improve wherever we can to become more sustainable and protect the environment around us.**

To achieve this all of our bottles are 100% recyclable, while our cans are infinitely recyclable and sourced only 65 miles from our farm. Even our shrink wrap is 100% recyclable and made up of 30% recycled plastic. We were the first in the industry to do this!

## Achieving zero waste to landfill since 2018

We've been a proud zero to landfill site since 2018 and have an expert in-house team to facilitate this. We support a circular economy, sending any waste, including our plastic, back to the source to be reused and recycled.

Since the end of 2023, 25% of our factory has been powered by the sun, thanks to our brand-new solar farm. We are proud that our environmental management system and site has also been certified to ISO 14001 standard.

# Our Sustainability Roadmap

**2018**

## Zero Waste to Landfill

Achieved zero-waste-to-landfill status, maintained to this day.

## Planet-Friendly Packaging

Installed Tetra Pak lines to offer more sustainable packaging.

## Recycled PET Bottles

30% of all bottles now made from recycled PET (RPET).

**2019**

## Locally Sourced Cans

Radnor sourced cans from a supplier 59 miles from its HQ, reducing transport emissions.

## Recycled Plastic Shrink Wrap

Introduced 30% recycled plastic in shrink wrap, which is 100% recyclable.

**100% RECYCLABLE**

**2023**

## Renewable Energy

Radnor's energy comes from renewables, with 25% of its annual electricity generated by its own solar farm.

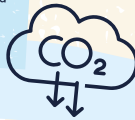

**2024**

## Sustainability Award

Won Wales Food and Drink Sustainable Business of the Year 2024.

## Net Zero Strategy

Submitted Net Zero plan to Science Based Targets Initiative.

**2025**

## Sustainable Supplier Award

Won the FWD's Sustainable Supplier award for 2025.

## Future Goals:

### Net Zero by 2045

Aiming for net-zero emissions by 2045.

## ISO 14001 Audit

Passed the 7th audit with zero non-conformances.
