## KASAI® KONRO GRILL

**SAFETY INSTRUCTIONS**  
**- READ BEFORE USE -**

**WARNING**

Thank you for choosing Kasai Konro Grills.  
**Please read all instructions before use.**

The Kasai Konro Grill should be operated by a competent person. They must be aware of the safety instructions and have read this manual.

Keep this user manual for future reference.  
 A digital copy is available from [www.sousvidetools.com](http://www.sousvidetools.com)

**HOT SURFACE**

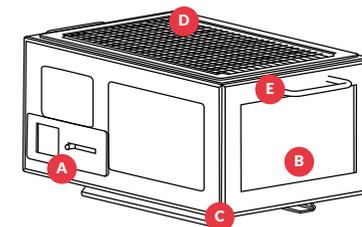

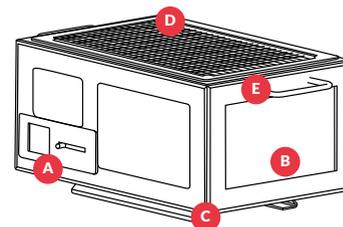

## IMPORTANT USER INSTRUCTIONS

- Ensure the Kasai Konro Grill is sited on a strong, sturdy and heat resistant surface. The surface may get hot, we suggest using a Kasai Konro Heat Mat to place the Kasai Konro Grill on whilst in use.
- The Kasai Konro Grill will become hot when in use and will remain hot for some time after use. USE CAUTION.
- Please keep appliance out of reach of children.
- Remove all packaging before use.
- Caution when moving hot appliance or coals. Ensure grill has fully cooled after use prior to moving.
- How to extinguish charcoal under normal use: remove charcoal from grill and submerge in water. DO NOT pour water in to the grill
- What to do in case of fire breakout: Please use a fire blanket or fire extinguisher to put out the fire.
- Air extraction of suitable specification is mandatory when using your Kasai Konro Grill indoors. Burning charcoal and wood produces Carbon Monoxide, which is hazardous when not extracted properly. You must seek professional advice if you are unsure about the correct extraction and ventilation.
- Before adding fuel to your Kasai Konro Grill ensure the chamber is free from any material other than the fuel intended to be lit. We DO NOT recommend using any fuel other than charcoal or wood.
- We recommend the use of smokeless fuel, which has not been artificially treated.
- Never add more than 2kg of fuel to the chamber of the SVT-16075 Nano Pro Kasai and SVT-16025 Little Kasai, 4kg of fuel to the chamber of SVT-16026 Medium Wide Kasai, SVT-16131 Medium Long Kasai and 5kg of fuel to the chamber of SVT-16062 Long Kasai and SVT-16132 XL Kasai.
- Do not position any flammable material less than 30cm from your Kasai Konro Grill.
- Clean and maintain your Kasai Konro Grill after each use, and only when it is completely cold.
- Remove and clear the ash when completely extinguished using a metal container. Remove the ash after each use to ensure good air circulation is maintained. Apply cold water to any ash to ensure it is extinguished prior to suitable disposal.
- We do not recommend using any accessories other than those accessories branded Kasai as they have been specifically designed for the safe use with Kasai Konro Grills. Do not use plastic vessels/utensils on the appliance.
- Due to the nature of the material this item is made from, they are not designed to be submerged in water, get wet or be left outside. Doing so will invalidate the warranty.
- Please note, this product is made out of natural mineral. After time it may develop hairline fractures, but this will not affect the quality or usage.

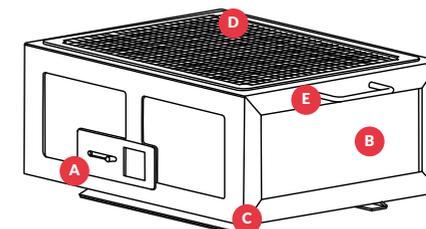

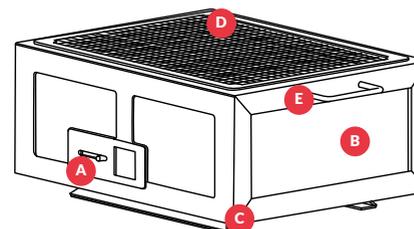

## INSTRUCTION OF USE

- Remove airplate (stainless steel plate) from plastic bag prior to use and site directly on top of base tile inside the grill. This airplate allows air to flow over the top tile, to reduce the heat underneath the Kasai Grill. This airplate must be used at all times when cooking.
- To light the Kasai Konro Grill, arrange a small amount of fuel in the chamber. In addition to the fuel, it may be necessary to add natural firelighters to help the fuel catch.
- Side open the air vents (A) to allow oxygen to access the fuel.
- Light the fuel or firelighters with matches or a gas gun.
- We recommend to start with a small quantity of fuel and add more over time as required.
- When the fuel is lit and at the desired temperature close the air vents (A) using protective glove or cloth, to maintain the temperature. You're ready to Grill!
- When you have finished using the Kasai Konro Grill ensure it has completely cooled before touching.
