

FRESH AT BRAKES

BALLYGARVEY EGGS

It all started in the early 1960's when 36 laying hens were sourced to supply Mark Davison's father's shop with really fresh eggs. By 1972 consumer demand had pushed the flock size to 1700 hens and Mark decided to leave his day job as a bread server in Belfast's Ormo bakery and concentrate on selling eggs instead of bread.

From humble beginnings in the 70's Ballygarvey Eggs has grown to become a leading supplier of free range & Organic eggs produced on small family run farms which pride themselves in high animal welfare and product quality.

All Ballygarvey eggs are transported to their purpose built packing centre in County Antrim where they undergo stringent quality checks before being packed for our customers.

All are fully traceable with RSPCA assured, and British Lion Quality approved. You can be sure of consistently high standards, egg after egg, from our family to yours.
